**SWIMMING POOL BARRIER AGREEMENT**

**BUILDING PERMIT #** \_\_\_\_\_

I, \_\_\_\_\_, understand that any structure intended for swimming or recreational bathing that contains water over 24 inches deep requires a fence, wall, building wall or combination thereof which completely surrounds the swimming pool and obstructs access to the swimming pool. An above pool exterior wall may act as the barrier if the wall is 4-feet from the ground all the way around the pool. A 4-foot high orange temporary fence may be used during construction for a period of 6 months only.

- **I agree that the barrier shall be installed prior to placing over 24 inches of water in the structure and prior to any use or final inspection.**
- **NOTE: The Code prohibits the use of the pool until the 4-foot barrier is in place. I understand that I do NOT have 6 months to install or complete the barrier.**
- **If the house is a part of the barrier, I understand an alarm must be installed on all doors directly accessing the pool and must be heard by the inspector (See attached barrier requirements).**

Failure to have the barrier installed is in violation of the Bedford County Building Inspections Resolution and is a misdemeanor. If you fail to comply, you may be cited to General Sessions Court for violating these provisions of the County Building Inspections Resolution and may be required to pay a fine.
